

LEED® Green Building Strategies and Green Associate Exam Preparation

This 36-hour course provides comprehensive preparation for the LEED Green Associate exam, a first step towards becoming a green building practitioner. The LEED Green Associate credential distinguishes practitioners with a sound knowledge of green design, construction and operations.

Designed by the **Canada Green Building Council**, LEED Green Building Strategies provides an overview of the techniques, approaches, materials and technologies used in the LEED v4 rating systems.

Using a wide range of examples, case studies and site visits, this course prepares you to:

- understand the imperative for a green transformation of our built environment
- explain the key components of the LEED v4 rating system
- apply core concepts and strategies to achieve success using the LEED v4 rating system
- determine where different LEED v4 rating systems can be applied.

This course can be taken alone or as part of the UBC Award of Achievement in Sustainability Management

Instructors:

BRENDA MARTENS, LEED AP BD+C

CHRISTIAN CIANFRONE, LEED AP BD+C

10 sessions: 8 Thu, Oct 16-Dec 4, 6:30-9:30pm and
2 Sat, Nov 1 & 22, 10am-5pm; UBC Robson Square. \$990
