Marketing Statement

A career at TransLink and our family of companies means working with people with a wide range of skills and perspectives, all teaming up towards a common goal: preserving and enhancing the region's world-envied quality of life. Together, we connect the region and enhance its livability by providing a sustainable transit and transportation network, embraced by our communities and people.

At TransLink we are dedicated to building a workforce that reflects the diversity of the communities in which we live. We're committed to fostering an inclusive, equitable and accessible workplace, recognizing the unique value and skills every individual brings.

Looking for a great place to work where your contributions are valued, and you can make a difference in a vibrant city? At TransLink, one of BC's Top Employers, you'll help make Metro Vancouver a better place to live, built on transportation excellence. Put your future in motion!

Responsibilities

PRIMARY PURPOSE

In pursuit of making the region a better place to live for everyone, built on transportation excellence, this role provides transportation planning expertise, leadership and project management to programs/projects of low to moderate impact, risk and complexity as well as contributes to projects of higher impact, risk and complexity.

KEY ACCOUNTABILITIES

To advance Enterprise and regional goals, provides transportation planning expertise, leadership and project management input to support the development of transportation planning policies, plans and strategies, ensuring compliance with Enterprise standards, policies and procedures, and legislative requirements for work of low to moderate impact, risk and complexity.

In support of evidence-based decision-making, researches and analyzes transportation data, trends and issues and develops methods, techniques, and models to ensure successful delivery and execution of work that is of low impact, risk and complexity and participates in work that is of moderate to higher impact, risk and complexity.

Contributes as a member of a program/project team to manage projects of low to moderate impact, risk and complexity in designing and developing project scope, schedules, and work plans, defining and prioritizing deliverables, preparing and monitoring project budgets, ensuring compliance with department standards, policies and procedures, and alignment to program, Enterprise and regional goals, identifying and recommending action on planning and project risks and opportunities based on analysis of transport data, trends, and issues. Solves lower risk issues and alerts senior staff to critical issues and risks.

Seeks to understand the lived experience and transportation needs of people and businesses in Metro Vancouver especially of disadvantaged and marginalized groups. Identifies opportunities to integrate this understanding in plans/projects.

Collaborates and provides technical expertise and advice to leaders and professionals across the organization with a view to optimizing planning services and project outcomes.

Develops technical reports and presentation materials to support discussions with Executives, elected and appointed officials, including the Board and Mayors' Council.

Nurtures collaborative relationships with internal colleagues and external stakeholders including advisory committees, staff at other government and public agencies, and other organizations and interest groups in order to understand needs, maintain open communication, provide technical support and advice, and proactively resolve issues of low to moderate impact, risk and complexity.

In support of advancing Enterprise and regional goals in open, inclusive and collaborative ways and engagement with external audiences, collaborates with internal stakeholders to scope and facilitate public, stakeholder, and partner consultation processes; collects, analyzes and reports out on consultation feedback from elected officials, policy makers, partners, stakeholders, and public to help identify issues and opportunities.

Oversees the work of contractors and consultants; provides work direction and monitors contract compliance.

Provides coaching, mentorship, technical guidance, and input on development and performance management to junior planning staff where applicable.

Qualifications

EDUCATION AND EXPERIENCE:

Typically requires a university degree (in Planning, Engineering, Public Policy or a related discipline), plus four (4) years of related experience.

OTHER REQUIREMENTS:

Advanced knowledge of the principles, theories, concepts and practices of transportation planning.

Knowledge of plans, products, roles and responsibilities of government agencies, NGOs and associations.

Solid knowledge of TransLink's decision-making context including its strategic context and organizational and governance structure.

Solid leadership skills with the ability to communicate and provide technical guidance and expertise to other transportation planning professionals and to lead projects.

Strong oral and written communication skills including the ability to write and deliver well-prepared reports and presentations.

Solid analytical skills including the ability to identify and communicate transportation planning and project-related risks and opportunities in an integrated, multi-disciplinary environment; also includes skills to analyze transport data, trends and issues

Strong interpersonal skills including the ability to build trust by consulting with internal and external contacts and applying a team approach as needed to achieve solutions. Also includes

negotiation skills to make refinements to contracts and to conflict resolution at a basic level of risk and complexity.

Solid decision-making skills including the ability to resolve transportation planning and project-related issues within defined limits or outside of the policies, and to identify and know when to refer issues to others.

Other Information

This position is a key role within TransLink's Transportation & Land Use Integration group, reporting to the Manager of Transit-Oriented Communities Planning (TOCP). The TOCP team is responsible for working closely with key partner agency staff to advance integration between TransLink's regional transportation plans and the land use plans of our partner agencies. These partner agencies include the region's local governments as well as Metro Vancouver, the Province of British Columbia, and other key partners whose land use plans, major developments, and related initiatives have implications for the regional transportation system. Given that the TOCP team's work focuses on land use and transportation integration, experience working in land use and development planning is considered a key asset for this position.

The Transit-Oriented Communities Planning team's key accountabilities include:

Leading cross-organizational input to local government and other partner agency land use plans, major developments and related initiatives that have implications for the regional transportation system; this work is largely focused on assessing how those initiatives align with regional goals (both the Regional Transportation Strategy and the Regional Growth Strategy), as well as TransLink's Transit-Oriented Communities Design Guidelines;

Implementing and reporting to the Mayors' Council and TransLink Board on the 'Supportive Policies Agreements' signed with local governments for land use, urban design and transportation related commitments that support the success of major regional projects such as Broadway Subway and Surrey Langley SkyTrain; and

Building the relationship between TransLink and partner agency staff via the development of communication guides, the management of the Regional Transportation Advisory Committee forum (RTAC, comprised of senior transportation staff from local, regional, provincial and federal agencies), and through strong internal coordination within TransLink for input to partner agency land use plans and major developments.

Recruitment Process: An applicant will be required to demonstrate their suitability for this position by meeting the minimum level of qualifications and experience in order to be invited into the selection process. A standard interview format will be used including general, scenario and behavioural descriptive interview questions.

Work Schedule

37.5 hours per week.

This is a 2-year temporary full-time position with an end date of April 10, 2026.

Work Designation

Hybrid

This position offers the flexibility of working both on-site and remotely within B.C.

Rate of Pay

Salary \$86,887 - \$108,608 per annum (Actual salary offered will be commensurate with education, experience and internal parity).

The Total Compensation Package includes Extended Health, Dental, Transit Pass and enrollment in the Public Service Pension Plan. Focus on your development through tuition reimbursement, training, and mentorship programs. Enjoy a variety of health and wellness programs, including access to gym facilities. Speak to us to know more about what we offer.
