SAVE THE DATE:

CREATING HEALTHY & SAFE COMMUNITIES

University of Victoria, UVSS Upper Lounge 9AM-4PM

How we plan and design our communities has a direct influence on our health and perceptions of safety.

This **FREE 1 day interactive workshop** (qualifies for 5.0 PIBC CPD learning units) will help you see the relationships between planning, design, and public health illustrated through examples on transportation, climate change, community safety, and natural environments. This hands-on workshop will showcase innovative case studies, using data, evidence, and tools to support the development of healthy public policy. Get this into your calendars ASAP, space is limited.

Topic Areas

- Climate Change
- Community Safety
- Transportation

How will you learn?

- Presentations
- Panel discussions
- Case studies
- Group exercises

Who is this for?

- Professionals working in land-use and development, resource and environmental management, policy planning and law, heritage conservation, transportation planning, and economic development
- Elected officials and decision-makers

This workshop is brought to you by the:

Regional Outcomes Monitoring Group

Membership: Capital Regional District, Island Health, Community Social Planning Council, United Way of Greater Victoria, University of Victoria, Intercultural Association of Victoria, Children's Foundation of Vancouver Island, Greater Victoria Public Library, Capital Region Food and Agriculture Initiatives Roundtable

Who are we? We are a voluntary multi-sector group looking to improve the health and well-being of the region. Our work operates around the social determinants of health with Healthy and Safe Environments being one of our priority areas for 2019.

Vision: To engage municipal staff in developing a suite of indicators that can help their work around creating healthy and safe communities.
