

Accelerating Housing Development with Intelligent Tools

A Demonstration of BC Housing's DASH & Planning Institute of BC's Intelligent Inventory

Join us for this special session featuring Mandy Hansen (LAI and Insight Specialty Consulting), Ray Kan (PIBC), Krish Mehta (NeuraCities) and Lisa Helps with BC Housing

Tuesday October 27th, 2026

LAI Vancouver is pleased to partner with the Planning Institute of BC (PIBC) in this salon social event to learn about new intelligent tools to accelerate the development process and housing delivery.

Join us for a lively evening of socializing, demonstrations and discussion to learn about BC Housing's new DASH (Digitally Accelerated Standardized Housing) and PIBC's Intelligent Inventory tools. These new, powerful tools can work together to quickly identify municipal development area policies and regulations and to develop standardized housing models that are aligned with municipal bylaws and with standardized construction methods. Ultimately, these tools serve to accelerate and de-risk the development process resulting in more potential housing on the ground.

Your registration fee of \$25 includes light food, your first beverage of choice (with cash bar thereafter), presentations by leaders involved in these intelligent tools, and a facilitated discussion to further implement DASH and PIBC's Intelligent Inventory.

PIBC Intelligent Inventory (search OCPs & zoning bylaws): intelligent-inventory.pibc.bc.ca

BC Housing DASH platform (accelerated standardized housing): www.acceleratedhousing.ca

Connecting professionals. Sharing knowledge. Advancing best practices.

Lambda Alpha International (LAI) is a global land economics society where top professionals connect. LAI provides a forum for the exchange of ideas in the fast-paced world of land use and development.

The membership of Lambda Alpha includes outstanding individuals from many parts of the world who have distinguished themselves in all of the various disciplines and activities that relate to the use and re-use of land. These individuals include not only those who are involved in the ownership, management, regulation and conservation of land, but also those who are involved in its development, redevelopment and preservation. This professional diversity creates a unique blend of perspectives and experience.
